

Supplemental table 1. Distribution of ever and current users of 5 tobacco product categories among U.S. middle and high school students, National Youth Tobacco Survey, 2014-2016 (N=60,393).

Characteristics	Tobacco product categories				
	E-cigarettes	Cigarettes	Cigars*	Smokeless tobacco [†]	Hookah [‡]
Ever-users ^{§,**}					
n	12,904	12,092	9,100	4,145	1,948
Weighted percent (95% CI) ^{††}	22.8 (21.5, 24.0)	21.0 (19.8, 22.1)	15.9 (14.9, 16.9)	7.8 (7.0, 8.6)	9.9 (8.8, 10.9)
Past-30-days users ^{‡‡,**}					
n	5,487	3,450	3,249	1,927	2,942
Weighted percent (95% CI) ^{††}	9.6 (8.9, 10.4)	6.0 (5.5, 6.5)	5.4 (5.0, 5.9)	3.6 (3.1, 4.1)	5.0 (4.5, 5.4)
Daily users in past 30 days ^{§§,**}					
n	581	690	361	560	100
Weighted percent (95% CI) ^{††}	1.0 (0.9, 1.2)	1.3 (1.1, 1.4)	0.6 (0.5, 0.7)	1.0 (0.8, 1.2)	0.6 (0.4, 0.7)

- ***Includes cigars, cigarillos or little cigars.**
- **†Includes chew tobacco, snuff or dip.**
- **‡Estimates are based on 2016 data only (N=20,765).**
- **§Ever use was defined as reporting ever using a tobacco product even once or twice (e-cigarettes), one or two puffs (cigarettes, cigars, hookah), or just a small amount (smokeless tobacco).**
- ****Only records that had consistent responses to questions about ever use and age of initiation of tobacco products were used. Proportion of inconsistent records was within 6%.**
- **††Denominator: all respondents.**
- **‡‡Past 30 days use was defined as reported use on 1 or more days in the past 30 days (i.e. either daily or someday use).**
- **§§Daily use was defined as reported use on all 30 days in the past 30 days.**
