

**Table A4:** Pearson correlation coefficients between dependent and predictor variables in the model for cessation rate<sup>1</sup>

Predictor variables	Dependent variable and predictor variables <sup>2</sup>						
	V10	V11	V12	V13	V14	V15	V16
V11	-0.34						
V12	-0.21	-0.04					
V13	-0.14	0.02	-0.22				
V14	-0.02	0.10	0.03	0.11			
V15	0.07	0.20	0.12	0.14	-0.07		
V16	0.49	-0.07	-0.04	0.16	-0.19	0.09	
V17	0.01	0.12	0.03	-0.07	-0.15	-0.08	-0.21

Notes

1. Sample size: 74

2. Variables were labelled as follows:

**Dependent variable**

V10 Cessation rate

**Predictor variables**

V11 Index of multiple deprivation

V12 Co-ordinator has responsibilities other than developing/running service

V13 Central base used (almost) exclusively by smoking cessation service

V14 General practices sometimes used by advisors to deliver cessation interventions

V15 Number of individual sessions in a complete treatment course

V16 Percentage of users receiving group support

V17 Protocol for dispensing or prescribing bupropion agreed with local GPs
